Ques: Analyze the effects of world war II on global polity, economy, society and science and technolog. 250 words.

Ans: World war II (1939-1945) effected the majority of world population and shook the world economy, It also resulted in new scientific & technological development. The society was changed and so the political conditions.

# UPSC

## EFFECTS ON GLOBAL POLITY

At the end of World War II, UNO & its associates were established with similar objectives like League of Nations (Peace).

WWII resulted in emergence of

new super powers; USA & USSR, Colonization came to an end, and several independent nations were established

## EFFECTS ON GLOBAL ECONOMY

WWII proved to be disastrous for the world economy. World economy crashed &

Inflation <sup>increased</sup> ~~rose~~ all over the world. Countries which were involved in WWII were highly indebted and this resulted in less development. Issue of poverty ~~rose~~ increased

## EFFECTS ON SOCIETY

Mixed effects on society as a large no. of people were displaced, they lost their families. More than 30 million (military + civilians) died. On the positive side - women started to work in unconventional jobs like mechanics, drivers and even in military. Equality and women empowerment

# UPSC

were indirect positive outcomes.

## EFFECTS ON SCIENCE AND TECHNOLOGY

New scientific development in the field of nuclear science, defense research, medicines and fighter aircrafts. ~~to~~ ~~the~~ Countries wanted to become nuclear power.

## Conclusion

was always result in massive destructions & damage to humanity & same is with WWII. people lost their wealth & family, Businesses suffered and countries were more indebted.

A little positive effects were women empowerment & scientific development that indirectly pushed the world towards a better future.
