उम्मीदवारों को इस हाथिए में नहीं लिखना चाहिए
 Candidates must not write on this margin

Ques

What is governance? How e-governance is different from e-government? - 150 Wo.

Ans -

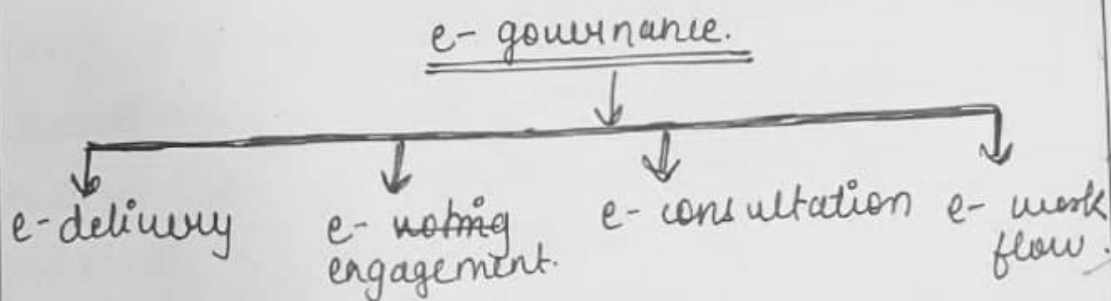

Governance - Governance includes all the processes of governing whether undertaken by a public entity, private group, government sector, corporate sector or any organisation through different rules, regulations, laws, or norms.

Governance focuses on

- Functions of government.
- Public welfare
- Collaborative affair.
- Minimum government and maximum governance.

It was introduced by International Monetary Fund and World Bank for better governance.

e-governance - It includes the services and facilities provided by the government over the internet for the public welfare.

It provides with the general as well as certain important services on the internet which provides

- easy access
- No third party
- less time

UPSC

Answer Questions in NOT MORE THAN the Word Limit specified for each in the Parenthesis.
Content of the Question is more important than length.
(Specimen Answer Booklet - For Practice Purpose Only)

Example of e-governance

- Digital India
- UMANG.
- Arogya Setu etc

e-government is based on super structure.

Thus, we can say that the establishment cost of governance is higher than that of e-governance and that's why e-governance is better as it serves the purpose of cost-effectiveness, better functionality and saves time both in processes as well as results.
