The public accounts committee examines the public expenditure *related with (a) & (b) only*

The public accounts is not only examined from a legal and formal point of view to find technical irregularities but also from a point of view of economy, wisdom and prudence.

Though being an important body, it usually faces certain criticism as well, such as:

It is only an advisory body, it neither prevents nor cure any matter.

It's kind of a postmortem.

Some scams such as 2G SCAM, 3G SCAM, 2010 Common wealth games are some of the important step backs.

But, with some better performance and a better result forming ability, it can surely come forth as a better an important committee.
