

Que What is E-Governance? What are its stages? Explain its use value? (150 words)

Ans.

E-Governance is the procedure used for governance using the modern information technology. This is for both government and private sector. E-governance can be seen everywhere nowadays.

Stages of E-Governance:-

- 1) One way communication
- 2) Two way communication

3) E-Services and E-financial - Example filing of tax returns.

4) Integrated communication.

(i) Inter government (ii) Intra government  
Government is integrated by electronic means both internally and externally.

5) Political participation - Eg. online public forums are used by us.

Use value of E-Governance:-

- 1) Transparency
- 2) Accountability
- 3) Cost effective
- 4) Time saving

- 5) Citizen engagement
- 6) Effective Outcome
- 7) Data driven approach
- 8) Empower citizens
- 9) Effective delivery of information

E-governance has proved to be very efficient and effective. It is contributing to good governance in our country.
