Q 1.

What is governance? How e-governance is different from e-government? 150w.

Governance - Governance is a process that aims towards the public welfare.

• It is a collaboration of various bodies, such as -

→ NHOs

→ Enlightened citizens

→ Corporate and Market

• Governance is a structural body that aims for Public welfare in saying of "~~less~~ Maximum Governance, Minimum Government".

E-governance vs **E-government**

• E-governance is a system. • E-Government is a structured functionality.

• It requires less people and gives the desired results. • It requires ~~at~~ government employees with less results.

• It is much time saving. (150) • It is time taking. (Procedure oriented)

- E-governance takes the better use of Information communication and Technology.
- E-government is technology driven but less impactful than E-governance.

Hence, it can be said that E-governance is a better form of government and different & better from E-government in terms of better provision of government services.
