Q Rajya Sabha 'useless stepney tyre' or the most usebul supporting organ. -150 words.

Rajya Sabha or upper house of the parliament can be said to be a usebul supporting organ as it is not useless and less powerful than Lok-sabha.

As we know, ^{Finance} Economy is the backbone of Administration'. A money bill is always initiated in Lok Sabha only and can not be rejected or returned by the Rajya-sabha. So it can not even play a role in fall of govt. as it happens when the money bill is not passed in Lok Sabha only.

However, there are some powers of Rajya Sabha which are keeping it into the supporting organ role. They are -

- it is a permanent house i.e., it can't be dissolved even in case of emergency it has chances not to be dissolved.
- The process of impeachment of a vice-president can only be initiated in Rajyasabha.
- As per art, 249 if a matter is declared to be of National importance with $\frac{2}{3}$

majority in Rajya Sabha. The parliament can legislate on the matter within 1 year.

- As per Art. 312 A matter of adding an All India services can be initiated in Rajya Sabha only.

Hence, it can't be said that Rajya Sabha is only a useless stepney type rather it has a useful supporting role to play.
