

Q. What is Insurgency? What are the linkages between Insurgency and Development? Explain the measures taken by govt to check insurgency in India?

[150W]

Ans :- Insurgency basically refers to the armed rebellion raised by the people ^{against government}, due to social, political or economic discontentment.

The disputes among the North East Indian states can be noted as an example of insurgency.

Link Linkage Between Insurgency and Development

Insurgency and development are correlated with each other. The lack of proper implementation of government policies leads to improper development. This makes the deprived people to rebel against the government in order to demand their rights. Thus, the situation of insurgency occurs.

Moreover, the lack of literacy and unawareness among the people also gives birth to insurgency.

separate division was created under Home Ministry to look upon this problem [LWE]

Insurgency is a major problem to our internal security. It should be checked and solved properly. The effective implementation of socio-economic policies such as Indira Awaaz, PM Awas Yojna, Ashrami Schools, PM Gramin Sadak Yojna will lead to the development of these areas, this may help in elimination of the problem of Insurgency.
